

John Doe

Active Secret Clearance

PROFESSIONAL SUMMARY

Network-focused Signal Support Systems Specialist (25U) with hands-on experience supporting **secure tactical communications, COMSEC operations, and IP-based networks** in operational environments. Proven ability to install, configure, troubleshoot, and maintain **voice, data, and radio systems** supporting mission-critical communications. Experienced in **secure enclave operations, equipment accountability, and retransmission network support**.

Demonstrated foundation in **HAIPE-aligned environments**, encryption handling, and network sustainment, with strong potential to support **Type 1 encryption systems and secure architectures**.

CORE COMPETENCIES

- | | | |
|--|---|---|
| ➤ HAIPE / Type 1 Encryption | ➤ Tactical Network Architecture (LAN/WAN, retransmission) | ➤ COMSEC Management & Key Handling |
| ➤ Secure Communications (Voice, Data, Radio) | ➤ TCP/IP Networking Fundamentals | ➤ Network Troubleshooting & Fault Isolation |
| ➤ Radio Systems & Signal Architecture | ➤ Equipment Accountability & Inventory Control | ➤ Systems Maintenance & Diagnostics |
| ➤ Technical Documentation & Reporting | ➤ | ➤ |

TECHNICAL SKILLS

- | | | |
|--|--|---|
| ➤ Operating Systems: Windows 10/11, Linux (Kali, Ubuntu) | ➤ Virtualization: VM environments for testing and training | ➤ Hardware: PC builds, repairs (RAM, SSD, PSU) |
| ➤ Networking: IP configuration, routing fundamentals, signal systems | ➤ Tools: Ticketing systems, diagnostic tools | ➤ Military Systems: Tactical radios, retransmission systems, secure comms platforms |

PROFESSIONAL EXPERIENCE

Signal Support Systems Specialist (25U) U.S. Army | June 1820– Present

Tactical Network & HAIPE-Aligned Support

- Installed, configured, and maintained **secure tactical communication systems** supporting brigade-level operations across voice and data networks
- Supported **secure IP-based communications infrastructure**, aligning with **HAIPE encryption architectures** in tactical environments
- Assisted in **integration of radios, retransmission systems, and network transport layers** to maintain continuous communications

COMSEC & Secure Communications

- Managed **COMSEC material and cryptographic loading operations** for brigade communications with **zero loss incidents**
- Coordinated secure handling and accountability of encryption devices and communication systems in accordance with DoD standards
- Supported **key management practices**, ensuring operational readiness of secure systems

Network Operations & Troubleshooting

- Troubleshoot **network, radio, and system-level issues** affecting mission-critical communications
- Performed **fault isolation, system diagnostics, and preventive maintenance** on communication equipment
- Maintained uptime of tactical networks in **high-pressure field and training environments**

Equipment & Systems Management

- Oversaw accountability of **\$500K+ in communications equipment**, ensuring compliance with property and security standards
- Built, configured, and repaired systems to meet operational requirements
- Maintained documentation of system configurations and operational status

Leadership & Field Operations

- Led retransmission team during **2 National Training Center (NTC) rotations**, ensuring uninterrupted communications
 - Trained and mentored personnel on **communications systems, network troubleshooting, and equipment operation**
-

EDUCATION

Bachelor of Science – Cybersecurity

New Mexico State University (In Progress, Expected Dec 2027)

CERTIFICATIONS

- CompTIA Security+
 - CompTIA A+
